Higgins Road, near the Bethel area, opened June 10th as road & bridge crews and contractors finished constructing a new bridge.

Lonnie Reavis, foreman, said the crossing was completed and opened on June 10th. The bridge, which is 24' wide, will make it safer and easier for the traveling public, Reavis added.

The Higgins Road low water crossing is one of four low water crossings that precinct 3 maintains. The other three are on Berry's Chapel Road, Lo Water Road and Morgan Road.
